

Ship Station License (Renewal)

- In the station/equipment section, the user cannot add another equipment entry for the emergency transmitter. As a result, only the main transmitter and the survival craft transmitter appear on the generated license. We suggest placing the power output, emission, and frequency band under 'Particulars', and adding a column for the emergency transmitters in the generated license.

Station/Equipment

Power Output (watts)*

Emission

Frequency Band

Particulars

Particulars of Equipment

Radio Equipment*

Make/Type/Model*

Equipment (No. 1)

Serial No.*

Frequency Range*

+

- In the generated license, under the "Particulars of Equipment" column, the sequence must be as follows:
 - Radio Equipment
 - Make/Type/Model
 - Serial No.
 - Power Output (Watts)
 - Class of Emission
 - Frequency Range
 - Frequency Bands

For Example:

- HF Equipment
- FEITONG FT-7500
- <22100472>
- 100
- J3E
- Range: 2-30 MHz
- Frequency bands that are assigned by the NTC

For the other equipment, the sequence is shown in the attached photo.

	a		b	c	d
	Equipment	Particulars of Equipment	Power (Watts)	Class of Emission	Frequency Bands or Assigned Frequencies
5	Main Transmitter (s)	HF Equipment: FEITONG FT-7500 <22100472> Range:2-30 MHZ	100	J3E	(558-USB) kHz 2182/4125/6215 - Safety/Distress 2635 (2635.4) - Intership 2658 (2639.4) - Intership
6	Emergency Transmitter (s)	VHF Equipment: FTGMDC FT-805 <230602272> Range:156-162 MHZ	25	F3E	ch 6: 156.300MHz: Intership/Safety ch 12: 156.600MHz: PCG/Harbormaster ch 16: 156.800MHz: Int'l Distress, Safety and Calling ch 13: 156.650MHz: Pilotsage
7	Survival Craft Transmitter (s)				
8	Other Equipment	Transciever : NAVTEX: NTX100A <A23020097> Receivers : SART: CY-AIS-SART <2023070134> Auto Alarm : RDF : Radar :	<div>Cashier's Box O.R. FOR THE COMMISSIONER:

ALAN FELIX MACARAYA
Regional Director, NTC VII

Region VII
Place of Issuance

Jul 16, 2025
Date of Issuance

ATTY. ELLA B BLANCA
Commissioner
"By Authority of the Commissioner"

Notes:

1. The registration of the above-stated radio equipment during the said period shall not be construed as an authority to possess, construct and/or operate the same without the corresponding permits/licenses Any violation pertaining to the use of such registered equipment including its use by persons other than the registrant shall be ground for appropriate administrative sanctions and/or fines and penalties as be imposed by this Commission.
2. All radio equipment registered under this Memorandum Order shall be at the accountability of the registrant
3. The subsequent licensing of all radio equipment to be registered under and pursuant to this Memorandum Order shall be in accordance with existing rules and regulations and the usual licensing

- For license validity, if a client's license expires on 10/24/2025, then the new validity period will be from 10/24/2025 to 10/23/2026 — effectively adding one year and subtracting one day from the previous expiration date. However, in the generated license and SOA, if the license has not yet expired, the new validity period will start on the date of renewal or issuance. For example, if the client's license is set to expire on 10/24/2025 but is renewed early on 7/14/2025, the generated license and SOA will show the new validity as 7/14/2025 to 7/13/2026. If the license is already expired at the time of renewal, the new validity period will start from the actual date of renewal.
- In the generated license, the Authorized Radio Operator does not appear, even though the client filled in the Radio Officer/Operator field.

Documentary Stamp Tax

Note: This license is valid only when payment of the required fees is indicated hereon.

- A Permit to Purchase was applied for, but a Ship Station License was generated instead.
- Once it is declined by the evaluator, the equipment gets duplicated and the license number changes when it is returned to the client.
- In the SOA report, there are no tabs for the surcharge.

Radio Station License (Renewal)(Group License)

- Is it okay to use this format for the group license, considering that the system is designed only for single licenses? The following bullet points outline the problems or concerns we encountered with single licenses.

ATTY. ALAN FELIX J. MACARAYA JR.

Officer-In-Charge

1 This license is issued subject to the provisions of Act No. 3846, as amended and the regulations promulgated thereunder, and the Radio Regulations annexed to the International Telecommunications Conventions.

2 This license is valid only when the payment of the required fees is indicated herein.

3 Renewal of this license should be filed sixty (60) days before expiration.

4 This license is issued subject to inspection of the radio station at any available time. Any discrepancy(ies) found at the time of inspection will cause the revocation of this license.

5 The actual operation of this radio station be carried only at all times by duly licensed radio operator.

6 Issuance of this license is without prejudice to any administrative cases filed against these stations or may be filed for previously committed violations.

Page 1 of 3

NOTE:

Issued without inspection. Any discrepancy or non-availability of this license during inspection is a violation of R. A. 3846, as amended

- In the license field, there is no 'Add' button for the client to add additional entries, even though he/she has more than one piece of equipment.

License

License No.*

- In the Transmission Type field, there is no 'Add' button in case the client's license includes a combination of simplex and duplex channels.

Transmission Type

Transmission Type* ▼

- There is a client who filed a renewal for a Radio Station License and inputted 40 pieces of equipment. However, when the client reviewed the form, only 10 pieces of equipment were visible.
- Every time there's a missing field that isn't filled out, it would be better if it gets highlighted or if the system brings the user back to that field.
- The table must include License Number, Location, Call Sign, Power (kW), Equipment, and Serial Number. Remove the fields for Frequencies, Bandwidth and Type of Emission, Antenna Particulars, and Remarks. For the Power field, indicate the unit as kilowatts (kW).

RENEWAL
10 June 2024

LICENSEE:	TERADYNE PHILIPPINES LTD.				
POSTAL ADDRESS:	Washington Rd., Cebu Light Industrial Park, Basak, Lapu-Lapu City				
FREQUENCY(IES):	Ch1:409.200 MHz; Ch2:409.550 MHz				
BANDWIDTH EMISSION:	F3E	NATURE OF SERVICE:		CV	
EFFECTIVITY:	10 June 2023	TO	9 June 2025		
SERVICE AREA:	Within Lapu-lapu City and vicinity.				

License No	Location	Call Sign	Power (kw)	Equipment	Serial No
------------	----------	-----------	------------	-----------	-----------

- In the requirements, remove the attachment for the appropriate and valid Radio Operator Certificate based on the Citizen Charter.
- The license validity is the same as that of the Ship Station License, unless it has already expired.
- If the client wants to renew his/her Radio Station License and then make a modification afterward, the information filled out during the renewal should automatically populate the modification form as well, since most of the fields are the same. Only the 'Modification Due To' field should be changed by the client, along with any specific updates to the equipment.
- In the SOA report, there are no tabs for the surcharge.

Radio Operator Certificate (ROC)

- Commercial Radio Operator Certificate (New) = change from 1 year to 3 years, RROC-Aircraft (New) = change from 1 year to 3 years, GROC (New) = change from 1 year to 3 years, SROP (New) = change from 1 year to 3 years.
- For RLMOP, instead of the maximum being 5 years, it should be set to 3 years for both new applications and renewals.
- For ROC, the customer selected a 3-year renewal for the certificate, but the generated certificate shows only 1 year.
- In the SOA report, there are no tabs for the surcharge.
- In RMAP, an application was submitted but did not appear on the evaluator's end.

General Concerns

- When previewing the requirements, is it possible to add a built-in magnifying glass feature to allow zooming in and out of the attached documents.
- The e-signature is not synchronizing with the evaluator.
- On the 'My Application' page from the client side, is it possible to display the company name so that clients don't have to keep previewing each application, especially if they have submitted multiple applications.
- The Permit to Sell/Transfer is not available under Aeronautical, Maritime, Fixed, and Land Mobile services.
- An auto-save feature must be added because some clients accidentally refresh or go back to the app, causing them to fill out the form all over again.
- In the search bar, when the evaluator types, for example, 'Radio Operator Certificate,' the system returns 66 results. However, when scrolling down, only a few are displayed, and there is no 'See More Activities' option to view all of them.
- If many customers sign up simultaneously, they are unable to receive the OTP. If possible, the OTP should be sent to both the phone number and email.
- There are some clients or evaluators who, despite entering the correct email and password, still receive the message 'Credentials provided do not match our records' from the system.
- Once decline the license # and the date of birth is automatically changed.
- In the client profile, the client cannot edit or change their details in case of a typo. The system responds with 'Failed to update your profile.'
- There should be a feature to edit the photo to a 1x1 size, similar to LinkedIn or Gmail.
- On the cashier's side, is it possible to view the requirements attached by the client in order for him/her to review them.
- In the reports tab, the SOA and the client's SOA are not synchronized.
- There is a client under SROP who is listed under a company. However, when the SOA is generated, the company's name appears instead of the operator's name, particularly on the Radio Operator Certificate section.
- Under the Radio Operator Certificate, except for RLM, when the client's certificate expires, the date of validity should default to the client's birthdate.
